

Swing Development, a company based in San Francisco with office in Warsaw, focusing on partnering with top Venture Capitals in Silicon Valley to help their portfolio companies move forward with their products, is looking for:

Node.js Developer

What will you be doing?

You will be helping create projects that can change industries. Sometimes it will be a mobile app API server, sometimes a large-scale data processing engine.

You will have huge creative freedom and ability to influence the project, so you will take ownership and responsibility for what you do.

You will work with your friends in Poland as well as directly with engineers from San Francisco.

You will have a lot of chances to develop your programming skills as well as learn a lot about how tech business is done in the US (if you will want to).

Learn more about our culture here: [Swing Dev Culture Deck](#).

We score 12/12 in [Joel 's Test](#).

Required

- Good knowledge of MongoDB, Express and Node.js (preferably at least 1 year of experience).
- Experience with CoffeeScript and task automators like Gulp.js will be a big plus.
- Experience with any other backend technology will be a huge plus.
- Knowledge how to make well-designed APIs.
- Experience in creating client-server applications.
- Good command of English. Sense of humour.

Included

- Gear with Apple logo and nice large Dell monitor.
- Single desk waiting only for you in office in city center, although remote work is OK too. Real
- American living out in Poland that you can talk to and pick up some West Coast slang (he loves to teach English).
- Delicious breakfast every Friday, cooked by one of us.
- Lots of laughs and fun with Polish and American folks.

How to apply?

Email a summary of your experience to marcin@swingdev.io
